

# LAND: EXPLORING EARTH'S LANDSCAPES

## GEOGRAPHY SERIES

by Donna Ward

This series includes four units of three lessons each for a total of 12 lessons. Lessons consist of a teaching video, a workpage, and additional curated videos in the Lite Membership. If selecting some of the curated content, each lesson may offer a few days of learning.

### Part 1: LANDFORMS

Exploring the big features of Earth's surface

1. *View of a Mountain:* Mountains, hills, valleys, formation
2. *Patterns of the Plains:* Plains, plateaus, lowlands
3. *Anatomy of a River:* River systems, erosion, transport, deposition

### Part 2: AQUATIC SYSTEMS

From freshwater to oceans

4. *Lakes of the Land:* Lakes, wetlands, inland water bodies
5. *Shapes of the Sea:* Coastal water bodies (bays, gulfs, straits, etc.)
6. *World Beneath the Waves:* Ocean floor features

### Part 3: NATURAL PROCESSES

How Earth is constantly changing

7. *Carving the Coast:* Coastal wave & wind processes, erosion & deposition
8. *Sculpted by Wind:* Desert wave & water processes, erosion, deposition
9. *Shaped by Ice:* Glaciers processes & glacial landforms

### Part 4: DIVERSE BIOMES

How climate shapes ecosystems

10. *Features of the Forest:* Forest layers, biodiversity
11. *Across the Grasslands:* Prairies, savannas
12. *Land of the Permafrost:* Cold environments, permafrost

Lesson completion is in process - 2026-2027.
